

IRAN'S PLAN FOR NUCLEAR COMPLIANCE

Note: This depiction is based on INFCIRC/711, which includes Iran's understanding of the timeline for resolving outstanding nuclear issues.

*The IAEA first reported the existence of uranium metal in Iran's nuclear fuel cycle in November 2005, but no timeframe has been set for resolving this issue.

**Where necessary, Carnegie has estimated dates based on the text of INFCIRC/711. These dates are the *earliest* possible for issue closure.
